

AMENDMENTS

In the Claims:

Please cancel claims 22, 37, 38 and 40.

Kindly amend the claims as follows:

B¹
21. (amended) A composition comprising micelles, said micelles comprising saturated and unsaturated phospholipids and one or more hydro-monobenzo-porphyrin photosensitizer

wherein said unsaturated phospholipid is not egg phosphatidylglycerol.

B²
27. (amended) The composition of claim 21 wherein said micelles further comprise at least one antioxidant.

28. (amended) The composition of claim 27 wherein said at least one antioxidant is butylated hydroxytoluene (BHT) and/or ascorbyl palmitate (AP).

B³
32. (amended) A method for making a composition of micelles comprising producing a mixture of an organic solvent, a hydrophobic agent and saturated and unsaturated phospholipids to form an "intermediate complex"; removing said solvent to produce a "presome" material, hydrating said "presome" material with an aqueous solvent, and processing said hydrated material to produce micelles, wherein said unsaturated phospholipid is not egg phosphatidylglycerol.

33. (amended) The method of claim 32 wherein said one or more hydrophobic agent is one or more photosensitizer but does not comprise benzoporphyrin derivative monoacid ring A (BPD-MA).

B4 39. (amended) The method of claim 32 wherein said processing step is selected from the group consisting of microfluidization, sonication, high speed shearing, and homogenization.

Kindly enter the following new claim:

B5 41. A composition consisting essentially of micelles, said micelles comprising saturated and unsaturated phospholipids and one or more hydro-monobenzo-porphyrin photosensitizer

wherein said unsaturated phospholipid is not egg phosphatidylglycerol.
